SUMMARY

Full-Stack Developer with hands-on experience building production-ready web applications using React, TypeScript, Node.js, and FastAPI. Proven ability to design secure REST APIs, implement real-time communication, and integrate AI-powered features. Strong foundation in clean architecture, authentication, and deployable solutions, with multiple live projects demonstrating end-to-end ownership.

SKILLS

- **Frontend:** React.js, Redux, Javascript, Typescript, TailwindCSS
- **Backend:** Node.js, Express, Python, Flask, Fast API, Web Socket
- **Database and DevOps:** MongoDB, Mongoose, SQL, Render
- **AI / ML:** RAG, YOLO, OpenCV

EXPERIENCE

Web Development Intern | Futures Intern (2025)

- Built and deployed full-stack applications using React, Node.js for real-world use cases
- Implemented RESTful APIs with JWT authentication and role-based access control to ensure secure data access
- Enhanced performance and maintainability through modular architecture and reusable components
- Collaborated with team members to deliver scalable, production-ready solutions

PROJECTS

Shahabaj: A Group of Projects

Tech: Fast API, React, TailwindCSS, OpenCV, Mediapipe, YOLO

- Deployed a responsive portfolio website showcasing multiple full-stack and AI-enabled projects with modern UI
- Developed an AI Image Editor allowing users to resize images and automatically blur faces
- Built an AI-powered chatbot using a RAG-based system to provide contextual responses based on user queries
- Implemented a Face Extraction tool that automatically detects and extracts faces from uploaded images using AI models

Resume Scorer: Know Your Resume

Tech: Fast API, React, Typescript, RAG, Vector DB

- Developed a web application that analyzes resumes based on target job roles and skill requirements
- Integrated AI-driven resume scoring and feedback using RAG and vector-based similarity search
- Enabled users to receive actionable suggestions to optimize resumes for improved job matching and ATS compatibility

Techis Talk : Techminds Meet Here

Tech: React, TypeScript, Node.js, MongoDB, WebSockets

- Engineered a real-time chat platform using WebSocket-based bi-directional communication, enabling low-latency messaging between authenticated users
- Built a secure authentication system with JWT, Google OAuth, OTP-based account verification, and encrypted password hashing following industry best practices
- Architected a scalable backend using Node.js, MongoDB to manage users, conversations, and message efficiently

EDUCATION

Masters of Computer Applications (**MCA**)

Lovely Professional University

CERTIFICATES

- Full Stack Web Development
- Getting Started with Machine Learning Algorithms
